ABOUT ME

Motivated and detail-oriented Computer Science Engineering student with a strong interest in Web Development, JavaScript, and Cloud Technologies. Passionate about building responsive and user-friendly web applications while continuously enhancing technical and problem-solving skills. A quick learner with hands-on experience in developing real-world projects and a keen interest in contributing to innovative teams through creativity, collaboration, and continuous learning.

EDUCATION

BACHELOR OF TECHNOLOGY (COMPUTER SCIENCE AND ENGINEERING)

Priyadarshini College Of Engineering,Nagpur

HSC

Shikshan Maharshi LT.shrihari Jiwatode Jr.College,Chandrapur

Year - 2022

Percentage - 63.33%

SSC

Dilasagram Convent School,Bamni

Year - 2024

Percentage - 75.4%

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, SQL, HTML5, CSS3
- Web Technologies: Responsive Web Design, Bootstrap, Node.js, Express.js, REST APIs
- Database: MySQL
- Tools & Platforms: Git, GitHub, VS Code, Postman, Canva
- Cloud: AWS (Basics)
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

INTERNSHIPS

Cloud Computing & DevOps Intern | Maincrafts Technology

July 2026 – August 2026

- Completed a 4-week internship in Cloud Computing and DevOps.
- Learned cloud infrastructure, deployment workflows, and DevOps fundamentals.
- Gained practical exposure to cloud technologies and modern software development practices.

CERTIFICATIONS

- C++ Programming
- Python Programming
- Digital Productivity With AI - UNICEF
- Design Fundamentals With AI - UNICEF
- Python For CyberSecurity

PROJECTS

1.Currency Converter | HTML, CSS, JavaScript, Exchange Rate API

- Developed a responsive currency converter web application using HTML, CSS, and JavaScript.
- Integrated a live Exchange Rate API to fetch real-time currency exchange rates.
- Implemented dynamic currency selection, input validation, and instant conversion results.
- Designed a clean and user-friendly interface to enhance user experience.

2.Mood-Based Music Recommendation System | Python, OpenCV, Machine Learning, Spotify Web

- Developed an AI-powered application that captures a user's facial image and detects their mood using computer vision and machine learning techniques.
- Analyzed facial expressions to identify emotions such as Happy, Sad, Angry, Neutral, and Surprise.
- Integrated the application with Spotify Web to automatically open and play songs based on the detected mood.
- Implemented image capture, emotion recognition, and automated music recommendation to deliver a personalized user experience.
